Bogotá, Colombia

Fullstack Java Developer with a strong foundation in software development and a unique background in visual arts. I specialize in designing and building web applications and systems using technologies such as Java, JavaScript, Bootstrap, and databases. My experience in visual arts enhances my ability to create user interfaces that are not only functional and intuitive but also visually engaging. This blend of technical expertise and creative insight allows me to deliver well-rounded, user-focused digital solutions with a strong aesthetic sensibility.

EDUCATION

Generation Colombia, online, Bogotá, Colombia
Junior Fullstack Developer / Java   **February 2025 – June 2025**

Platzi, online, Bogotá, Colombia
Frontend Developer Specialization   **May 2024 – November 2024**

Universidad Pedagógica Nacional, Bogotá Colombia
Bachelor's Degree in Visual Arts   **January 2019 – April 2024**

PROFESSIONAL EXPERIENCE

Universidad Pedagógica Nacional, Bogotá, Colombia
Research Assistant   **February 2022 – November 2023**
- Led data analysis for a research project on young people's experiences with Colombian cinema, using digital tools to organize, synthesize, and present findings.
- Identified and highlighted patterns of critical thinking in 85% of participants, enhancing the study's qualitative approach.

PROJECTS

Arteria - *Fullstack Developer*   **April 2025 – June 2025**

- E-commerce platform built with HTML, CSS, JavaScript, and Java Spring Boot, designed to connect emerging artists with buyers interested in local art. The project features responsive design, category-based navigation, and dynamic artwork loading.
- Implemented both frontend and backend functionalities, working with a relational database to manage users and products through RESTful endpoints. Data was stored, retrieved, and manipulated using JPA and Spring Data. [Click here!](#)

Batatabit - *Frontend Developer*   **October 2024**

- Developed a replica of the Batatabit informational website as a practical exercise using HTML and CSS. Applied responsive design principles to ensure optimal display across devices.
- The project simulates the homepage of a cryptocurrency exchange platform, emphasizing clean structure, clear visual hierarchy, and adaptability. [Click here!](#)
